FARMERS

OF

Mahoning County

OUR COUNTY is getting lined up squarely behind the greatest movement in the history of agriculture.

That movement is the organization of the farmers of the country through their county farm bureaus, into a nation-wide Farm Bureau Federation.

County associations among farmers everywhere and county agents throughout the country have worked wonders for their own localities. But their power has been limited. They could not go out of their boundaries to tackle the larger national problems of marketing and the like that lie at the bottom of the present day farm problem. These are just the problems that the American Farm Bureau Federation is going after. Already 65,000 Ohio farmers and more than a million farmers in the land have joined this American Farm Bureau Federation. If you stand for "a square deal for agriculture" now is your chance to make it known by tying up with these farmers.

Of all branches of human endeavor, we farmers today constitute the only class that is still working practically as individuals. All other business is organized. Labor is organized. And we must meet organization with organization in order to correct the unsatisfactory conditions which are making it so extremely difficult today to farm profitably.

We Must Stick Together

The advancement of agriculture depends upon it. The prices of our farm products depend upon it. Our ability to do our share in settling the critical questions of the present time depend upon it.

We must stick together. We can stick together if we join the Farm Bureau—the first real, National Business Organization for Farmers.

It is an organization of farmers, operated for farmers, run by farmers.

ers. It is ready to tackle the big farm problems of

Marketing,
Transportation,
Farm help,

Right returns for your time,
your land, your labor,

and it stands squarely for your interests in helping solve these problems in a fair, equitable way for agriculture.

We Count on You

A canvass will shortly be made of every farm in this county. Farmers whom you know personally, accompanied by other farmer members of the Ohio Farm Bureau, will come to visit you. They will point out the advantages—to you, to your neighbors and to the industry of farming—of the Ohio Farm Bureau Federation and the national organization, the American Farm Bureau Federation.

Here is your chance to show that
